

Web Developer

Date: 3-Jul-2019

Location: Egham, UK

Company: Webtrends Optimize

In a fast pace “always connected” world, optimising online customer experience is essential to keep businesses ahead of their competitors. However, many companies start website optimisation in a piece-meal fashion with no strategy around what, or how they are going to implement it.

To get the best results requires planning, expertise and experience – something Webtrends Optimize’s comprehensive toolkit offers to all our clients.

Life at Webtrends Optimize is dynamic and full of opportunities, fusing the energy and enthusiasm of a start-up with the heritage of a well-established product, and the knowledge of a hugely experienced team who know the industry inside out. We can offer you the chance to create, learn and innovate; and also offer a flexible benefits package with a range of options to match your lifestyle.

Position Description:

Webtrends Optimize is seeking an experienced, detail-oriented web developer to implement website optimisation projects (AB Testing, MVT, Personalisation) using our enterprise-grade testing and targeting platform.

You will work in a close team of Consultants/Analysts, Developers, Creative and Quality Assurance members, to deliver solutions for our clients, working both independently and in a team environment. If you're passionate, creative and an organised self-starter with real expertise working with JavaScript, this is great opportunity to expand your career. If you love a challenge and want to make a difference, this is the place for you.

Primary Responsibilities:

- Web content creation/manipulation using JavaScript, CSS, HTML/XHTML
- Working with analysts and technical specialists to map out implementation requirements
- Executing highly critical technical processes in a fast-paced, dynamic environment
- Managing technical implementation projects to tight schedules and precise deadlines

Interaction:

This position operates in a team-oriented environment. As a result, the successful candidate will build and maintain strong and effective working relationships internally with Client Services, Product Development and Support teams.

Required Skills:

- 1 or more years' experience in fast-paced commercial website development environments
- Strong expertise of JavaScript, jQuery, HTML and CSS/3.
- Knowledge of HTTP, Cookies, AJAX
- Awareness of responsive design practices
- Problem solver, with desire to excel in challenging environments
- Extremely detail-oriented self-starter with a 'get it done' attitude
- Ability to adapt quickly and respond effectively in high-pressure, multi-tasking situations

Preferred Skills:

- Program/project management experience, experience working directly with customers
- Familiarity with tools such JIRA, Trello and Slack
- Demonstrated web design focusing on usability, standards and accessibility
- Graphical design skills

Working Conditions:

- The position is located at our Webtrends Optimize office in Egham, UK
- The job involves extensive time working at a computer
- Candidate must pass background check

Position Type:

- Regular/Permanent, Full-Time 9:00-17:30
